

The UniCom[®]-LT controller was specifically designed to manage a network of GeminEye[™] imaging nodes. The powerful digital controller is capable of managing all camera functions and up to 99 nodes and addresses, yet is very affordable.

This unit is fully equipped with a proportional joystick for simultaneous azimuth/elevation movement. As a component of the GeminEye system, the UniCom-LT meets every expectation from innovation to integration.

Key Features

- Proportional joystick with high speed or precision jog for pan and tilt movement.
- Comprehensive test software, operating diagnostics.
- Movement options possible through preset, jog or direct entry of coordinates.
- 20 character by two-line LCD.
- Desktop or rack mountable (rubber feet supplied)
- Two-year warranty.
- Optional video display insertion module for visual overlay of position.
- 32 Preset pointing location / four surveillance patterns
- 120 VAC wall transformer
- RS 232, 422, 485
- Controls zoom, focus and iris functions
