# NEWS RELEASE

Moog QuickSet® unveils the new [www.quickset.com](http://www.quickset.com) showcasing a new look, up-to-date information and enhanced search functionality for visitors and customers.

**June 2010:** Moog QuickSet, the leader in security and surveillance components and integrated systems has announced a major redesign of their corporate website. This new look and up-to-date information will help visitors and customers of Moog QuickSet make more informed decisions on the type of products and/or systems that are best for their applications.

"Our new website will allow visitors to the site the ability to access important product information that is critical to their security and surveillance needs. It will also serve as an industry resource for current trends in the market," said Andy Lareau, General Manager of Moog QuickSet.

Ongoing enhancements and updates will be made to the site as part of a recently implemented marketing program to continually bring the most up-to-date and relevant information to visitors and customers.

"Our goal is to be the industry leader, not only in our products and technologies, but as the go-to for timely communications for what is happening in the industry" said Jim Fennig, Director of Sales and Marketing for Moog QuickSet.

**With over 75 years of expertise, Moog QuickSet is the global leader in manufacturing rugged components and integrated security and surveillance systems around the world. Our mission is to provide solutions that incorporate high performance components into integrated systems to deliver optimal performance packages for our customers.**

**Our products are manufactured to withstand the harshest environments and toughest applications, achieved by a series of rigorous design requirements. Moog QuickSet has earned the reputation among companies and government agencies as being the "go-to" for dependable and reliable security and surveillance systems.**
